

Advanced Hardware Supply Inc

Drawer Slides

Advanced Hardware Supply Inc has been the go-to source in the Rocky Mountain Region for cabinet drawer slides for over 24 years. We carry 3 of the typical slide applications, and below we will help you identify what you're looking for. **Quick tip**- Soft-close means the drawer closes the last inch or so on its own, and **softly**. Self-close is where the drawer can **slam** shut, and bounce back.

SIDE MOUNT

Side mount drawer slides provide a simple design, and versatile mounting options. We carry an array of side mount drawer slides- both in soft-close and self-close, and the only real difference is the way they close. Pre-drilled hole locations remain the same.

This product is a KV Tru-Trac non-soft close side mount drawer slide

Although there are many types of side mount drawer slides, ball bearing is the most common. This allows a durable, smooth operation over and over again.

EURO SLIDE

The below slide is commonly mistaken as a side mount slide. This is actually a ***Euro slide*** (also Roller Slide.) These are typically white (or off-white) and mount to the bottom/side of the drawer. Typically contain a roller on the drawer side, as well as the cabinet side. Euro Slides typically only come in a self-close option, although there are ways to add on components to make each drawer soft-close. This is only recommended when moving to a side mount slide is not an option.

UNDER-MOUNT

Under-Mount drawer slides are exactly what the description says- they mount to the bottom of your drawer. This style of slide is growing in popularity, as people move toward hidden hardware, and wanting a cleaner, simpler look. This style typically comes with brand-specific front mounting clips. At AHS, we only offer under-mount drawer slides in soft-close.

What size do you need?

Side mount drawer slides come in 2" increments, typically beginning at 12" and up to 24". If you need larger (longer) slides we can accommodate that, typically those are for heavier weight capacity needs- but it is possible! All of the side mount slides we sell at Advanced Hardware Supply Inc are rated at 100lbs or higher. Usually this is more than enough for any project. If you need it, we do have slides with capacities of 150lbs, and even 200lbs. We can get you what you need!

Under-mount drawer slides come in 3" increments, typically beginning at 12." As with side mount and euro slides, our slides are rated for 100lbs or more. If you need larger under-mount slides come in and see us at one of our 4 locations.

As usual, we prefer you bring in the slide you are trying to replace, as we can show you replacement techniques and practices. Still have questions? Give us a call!
